

ZERO WASTE POLICY

Objective:

Arulmigu Palaniandavar Arts College for Women, Palani adopts Zero-waste Policy, with the primary motive of bringing in a change the way we live with the Nature and the Environment around us. It is sure, if every member of the institution adheres to the Policy, it will result in significant reduction of waste.

The Primary Focus:

The college community imbibes the responsibility of conserving the universe around them. Managing the waste from the daily life is a skill. Yet more, the college goes one step further to avoid the habit of 'wasting' and thus the non -biodegradable waste will come to zero level. The mantra of 'Reduce, Re-use, Recycle' is central to the institution in all its activities.

How to follow Zero Waste Policy:

- Avoid the use of all types of disposables, including plastic and paper in daily life.
- Avoid 'use and throw' carry bags. Always use bags made of eco-friendly materials
- Always use cloth banners instead of flex.
- Always use cups and containers that can be washed and reused instead of those made of plastic or paper.
- Segregate bio and non-bio degradable and compost bio degradable waste, using simple and appropriate composting devices.
- Keep the non-bio degradable materials clean and dry and hand it over to local body systems.
- Always use eco-friendly materials like real leaves and flowers for decoration during any celebration at the college.
